KITCHEN SATIN PAINT

Application tips

Once you have selected your colours, its time to get coating.
Follow these simple steps to ensure a perfect finish.

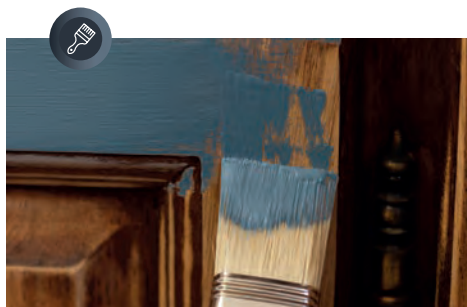

TILES: Prep is key, wash the surface to remove grease and residue.

Apply 2 coats with a short pile roller, allowing 8h dry time in-between.

CUPBOARDS: Prep is key, sand thoroughly with 180 grit. Dust and wash the surface.

Apply 2 coats using a brush or short pile roller.

Finish with REFRESH Kitchen Extra Strong Varnish.

For the ultimate protection finish your kitchen projects with REFRESH Kitchen Extra Strong Varnish.

REFRESH YOUR KITCHEN EFFECTS PAINT

To give more character to your kitchen, the REFRESH Kitchen range offers a variety of effects including Rust, Wood and Concrete.

By recreating the grain and colour of wood, REFRESH Wood Effect Paint is used to easily transform surfaces of a kitchen into a beautiful wooden finish with added texture and brightness. Apply directly without an undercoat.

CUPBOARDS, WORKTOPS & SPLASHBACKS

NO UNDERCOAT
Extremely Durable

**ULTRA-RESISTANT
TO STAINS & SCRATCHES**

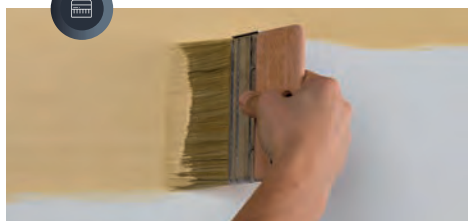

WATER RESISTANT

375 ML = 3 m² finished

WOOD EFFECT

Step 1 : APPLY THE BASE COAT

Stir and apply 1 coat using a small brush in the direction chosen for the grain. This first step coats the surface and creates a grain. Depending on the initial colour of the surface, a second coat may be necessary. Allow 12h dry time.

Step 2 : APPLY THE TOP COAT

Stir and apply 1 coat in the same direction as the base coat. The finish is semi-transparent and will seep into the grain made by the base coat to highlight and create a wood effect.

WOOD EFFECT CHART

RUST & CONCRETE EFFECT

To give more character to your kitchen, the REFRESH Kitchen range offers a variety of effects including Rust, Wood and Concrete.

Create the appearance of rust or unpolished concrete across your kitchen surfaces to inject a modern, industrial feel into your home.

Step 1 : APPLY THE BASE COAT

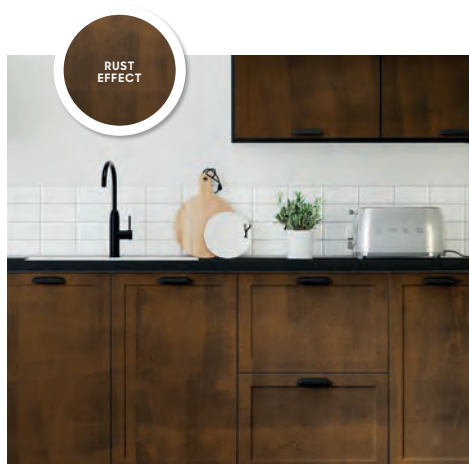

Stir and apply the base coat with a short pile roller. Use criss-crossing strokes and lay off. Two coats are necessary allowing 12h drying between each coat.

Step 2 : APPLY THE TOP COAT

Stir and apply the top coat in small areas with criss-cross strokes and finish by laying off. To create a more pronounced effect, don't cover the base entirely. Apply a second coat to enhance the finish to your liking.

RUST & CONCRETE CHART

REFRESH YOUR KITCHEN CONCRETE COATING

REFRESH KITCHEN & BATHROOM Coating is a new and innovative way to renovate your home.

A ready-to-use concrete effect coating that hides tiles and decorates all in one, leaving a smooth concrete finish in place. Inject the modern, industrial finish

of waxed concrete into your kitchen without the investment. It is applied directly without an undercoat and is specially designed to withstand stains and scratches.

Take your kitchen renovation to the next level with this stylish solution.

WATERPROOF

COATING

9 kg = 4.5 m² finished (in 2 coats)

VARNISH

2 x tubs 500ML = 5 m² finished (in 2 coats)

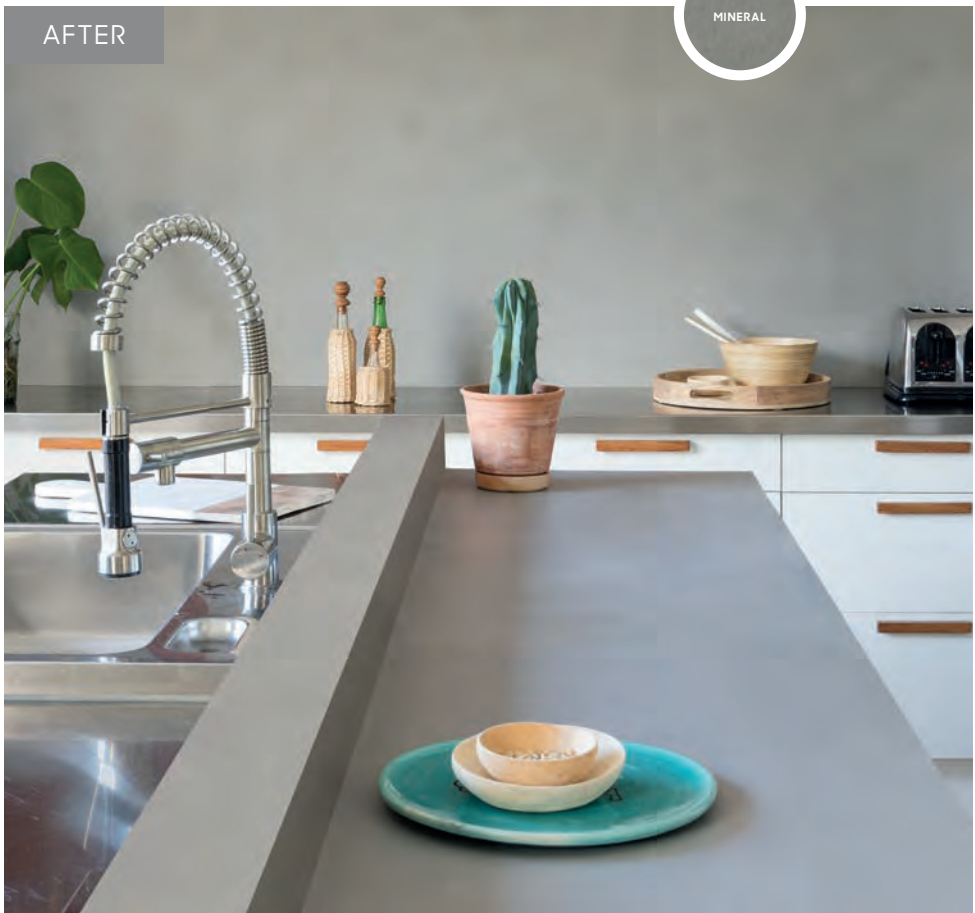

BEFORE

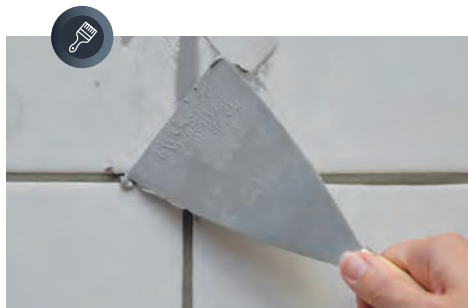

Removing dated tiles is a thing of the past, REFRESH Coating seamlessly hides grout lines and can be used to cover tiled kitchen walls, splashbacks and worktops.

AFTER

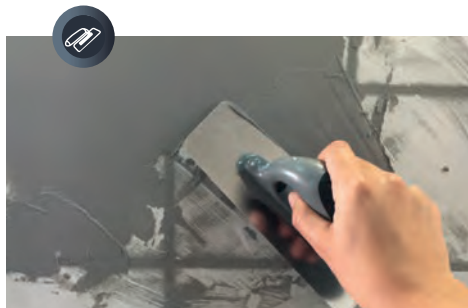

KITCHEN CONCRETE COATING

Application tips

Step 1 : APPLY THE BASE COAT

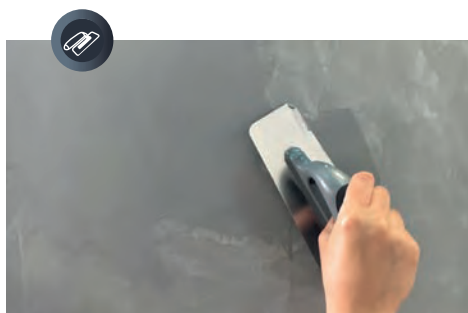

Fill in the grout lines using a filling knife. Press the coating on the tiling to fill and avoid excess thickness. Leave to dry for 6h.

Step 2 : APPLY THE 1ST COAT

Use the filling knife to scrape away any excess thickness. Remove any dust, then use the trowel to apply the coating on an area of 0.5 m², load enough product to cover the tiling.

Smooth the fresh coating using the trowel, working from the uncovered areas toward the already painted areas. Leave to dry for 24h.

Step 3 : CREATE THE CONCRETE EFFECT

Sand down any ridges to achieve a flat and even surface. Apply a thin coat of product, making short round movements. Then press lightly with the empty trowel on the fresh coating. If the grout lines are still visible, repeat step 2. Leave to dry for 24h.

Step 4 : MANDATORY PROTECTION EXTRA STRONG VARNISH

It is essential that you protect the coating with REFRESH Extra Strong Varnish specially designed for high-usage surfaces. Please note that 2 tubs of 500ML Varnish are necessary to protect 5 m² of coating.

Detailed instructions provided under the lid of REFRESH Coating.
