

1) Hold the light up to the wall and decide on the perfect spot.

2) Mark a pencil line on the brick to indicate the base height of the light.

3) Centre the mounting plate or bracket on the wall and determine the height to the pencil line also check for vertical or horizontal.

4) Mark the holes to be drilled with a pencil.

5) Drill all the holes slightly deeper than the plugs in the kit.

6) Push the plugs into the holes and tap in lightly with a hammer until flush with the wall.

7) Fix the mounting plate to the wall.

8) Fit the light to the mounting plate and admire.
