Product Data Information for Users of Honda Miimo HRM40 HRM 40 Live / HRM 70 live (Art. 3 (2) EU Data Act)

Your Honda Miimo HRM40 / HRM40 Live / HRM70 Live generates product data which you may access and manage in accordance with the statutory regulations, in particular the EU Data Act.

In this Product Data Information, we inform you, in your capacity as a user under the EU Data Act (see definition below), which type of data your Miimo HRM40 / HRM40 Live / HRM70 Live generates, potential volume of such data, how it is stored, shared and how you can access and manage such data, and which rights you have regarding the data. We therefore ask you to read the following information carefully.

Definitions

Connected Product means an item that obtains, generates or collects data concerning its use or environment and that is able to communicate product data via an electronic communications service, physical connection or on-device access (e.g. a connected lawnmower).

Product data is data generated by the use of a connected product that is designed to be retrievable, via an electronic communications service, physical connection, or on-device access.

User is a person that owns a connected product or has the right to use that connected product or that receives related services.

Data holder means a natural or legal person that has the right or obligation to use and make available data, including, where contractually agreed, product data or related service data which it has retrieved or generated during the provision of a related service.

Regarding the terms used in this Information, we also refer to the definitions in Art. 2 EU Data Act.

In accordance with Art. 3 EU Data Act we provide the following information to users:

1. **the type, format, and estimated volume of product data which the connected product is capable of generating:**

   When you use your HRM40/70 live it generates and transmits certain Product Data. This data can be stored both on-device or on a remote server at the same time (For HRM40 non-Live, data is only stored on device). This involves the following data:

   a) T*ype of data:* The product may generate the following type of data during its use. The actual generated data depends on the particular usage of the product.

   - Operating Information

   - Battery Information

   - Component temperatures

   - Activation of functions

   - Failure and protection events

   - Application information

   - Scheduling information

   - State changes information

- Network information

- Weather information

- Garden map information

- Configuration information

- Location information

b) *Format*: In the case of HRM40 Live and HRM70 Live the data is provided in a commonly used and machine-readable format (e.g., JSON). For HRM40 non-Live: data is only stored on device and there is no data access provided (see 4. a) below)

c) *Estimated volume*: product data that the HRM40 / HRM40 Live / HRM70 Live is capable of generating depends on how often and for how long it is used. The data generated and transmitted continuously and in real time can reach a volume of up to 500kB.

2. whether the connected product is capable of generating data continuously and in real-time:

Yes, the product is capable of generating data continuously and in real-time.

3. whether the connected product is capable of storing data on-device or on a remote server, including, where applicable the intended duration of retention:

Product data is stored on the device while the product is powered on. In addition, the HRM40 Live and HRM70 Live products send data periodically to the cloud. There is no defined retention period. Customer data is deleted when customer account is deleted

4. how the user may access, retrieve or, where relevant, erase the data, including the technical means to do so, as well as their terms of use and quality of service:

a) How users can access product data

If you are a user, you can access the product data via the mobile application Mi-monitor HRM40 Live / 70 Live. For HRM 40 there is no access available on device and no data is kept by Honda, i.e. not accessible/available from Honda.

b) How you can erase product data:

Product data on Honda server is deleted when customer account is deleted (except for HRM 40 for which there is no on server data anyways). Data cannot be erased on device.

5. Changes to this Product Data Information Policy

New legal requirements, company decisions or technical developments may lead to changes to this Product Data Information and require us to adapt this Product Data Information document accordingly. The current version can be found on our website. Please note that external links to third-party websites or their contact information may change over time. If you find information that is no longer up to date, please let us know.
