

Related Service Data Information for Users of My Generator app (Art. 3 (3) EU Data Act)

By using your My Generator app together with your EU32i generator, data is generated which you may access and manage in accordance with the statutory regulations, in particular the EU Data Act.

In this Related Service Data Information, we inform you, in your capacity as a user under the EU Data Act (see definition below), which type of data your Honda EU32i and My Generator app generate, potential volume of such data, how it is stored, shared and how you can access and manage such data, and which rights you have regarding the data. We therefore ask you to read the following information carefully.

Definitions

Connected Product means an item that obtains, generates or collects data concerning its use or environment and that is able to communicate product data via an electronic communications service, physical connection or on-device access (e.g. a connected generator);

Product data is data generated by the use of a connected product that is designed to be retrievable, via an electronic communications service, physical connection or on-device access.

Related Service means a digital service that can be linked to the operation of a connected products (resulting in a two-way/bidirectional exchange of data) and that affects the functionality, behavior or operation of this connected product (in such a way that its absence would prevent the connected product from performing one or more of its functions). Typical example is an app that is connected to a connected product.

Related service data means data representing the digitisation of user actions or of events related to the connected product, recorded intentionally by the user or generated as a by-product of the user's action during the provision of related service by the provider.

User is a person that owns a connected product or has the rights to use that connected product or that receives related services.

Data holder means a natural or legal person that has the right or obligation to use and make available data, including, where contractually agreed, product data or related service data which it has retrieved or generated during the provision of a related service.

Regarding the terms used, we also refer to the definitions in Art. 2 EU Data Act.

In accordance with Art. 3 (3) EU Data Act we provide the following information to users:

1. the nature, estimated volume and collection frequency of product data expected to be obtained and, how to access or retrieve such data, including the data holder's data storage arrangements and the duration of retention:

When you use your EU32i generator, it generates certain Product Data. This data is stored *on-device*. This involves the following data:

- a) *Type of data*: CAN data is generated by the computer in the product: real-time operating data (engine speed, sensing data etc.) DTC data (codes, data on operating conditions when error codes occurred), calibration data.
- b) *Format*: CAN
- c) *Estimated volume*:
 - a. maximum capacity of diagnostic data that can be stored: 2 Kbyte
 - b. Actual used capacity with data allocation: 0,75 Kbyte

d) *Duration of retention in the connected product / on remote server:* No data on any remote server. The data is stored on the device until the amount of data exceeds the storage capacity of the device, in which case the oldest data is deleted.

e) How to access and retrieve such product data: see below 2.

2. the nature and estimated volume of related service data to be generated and how the user can access or retrieve such data, including the prospective data holder's data storage arrangements and the duration of retention and how the user can request that the data are shared with a third party and, where applicable, end the data sharing

a) **Nature of data:** There is no additional service data, only product data.

b) **Estimated volume of related service data to be generated:** up to 1kb.

c) **Data storage arrangements and the duration of retention:** Data is stored in the cache of the smartphone and will be cleared once the user clears the cache.

d) How users can access product data and related service data

If you are a user, you can access the related service data by Opening the app and viewing the data. It is not available for download.

e) How to request data is shared with a third party:

Sharing with third parties is not possible, and Honda is not a Data Holder.

f) How to stop data sharing with third parties:

n/a

g) How you can erase product and related service data:

You cannot erase internal product data intentionally.

3. whether the data holder expects to use readily available data itself and the purposes for which those data are to be used, and whether it intends to allow one or more third parties to use the data for purposes agreed upon with the user

Honda does not collect the data generated inside the connected products.

4. Recipients of product and related services data

Currently we do not allow other parties to use the data.

5. the identity of the data holder, its trading name and the geographical address at which it is established and of other data processing parties and the means of communication which make it possible to contact the data holder quickly and communicate with that data holder efficiently

Honda is not holding data from related service. Any service data is on the cache of the smartphone.

6. whether the data holder is the holder of trade secrets contained in the data that is accessible from the connected product or generated during the provision of a related service, and, where the prospective data holder is not the trade secret holder, the identity of the trade secret holder

n/a.

7. the duration of the contract between the user and the data holder, as well as the arrangements for terminating such a contract.

n/a.

8. Your right to lodge a complaint

As a user, you have the right lodge a complaint with the relevant competent authority in the EU Member State in which you have your habitual residence or place of work if you consider that your right under the EU Data Act has been infringed (Article 38 EU Data Act).

9. Changes to this Related Service Data Information

New legal requirements, company decisions or technical developments may lead to changes to this Related Service Data Information and require us to adapt this Related Service Data Information document accordingly. The current version can be found on our website. Please note that external links to third-party websites or their contact information may change over time. If you find information that is no longer up to date, please let us know.
