

At home

Viewing through
the Parent Unit,
WiFi or app
not required

On-the-go

Viewing via the baby app
on your smart phone/tablet

With Direct WiFi Mode, the monitor is ready to use out of the box for local monitoring between parent unit and camera.

With Router Mode, the parent unit and camera are paired to operate via the WiFi router, this also allows remote access to the camera via the MyVTech Baby HD app. Once Router Mode set-up is completed, the parent unit will auto switch between Direct WiFi and Router Modes for better connectivity – the camera can then continue to be viewed/controlled via the app even if the unit switches to Direct WiFi Mode.

True-Color video in daylight

720p HD True-Color video quality

CMOS image sensor with professional IR-Cut auto filter provides sharp images in true-to-life colors and 7x more pixels than standard monitor screens.

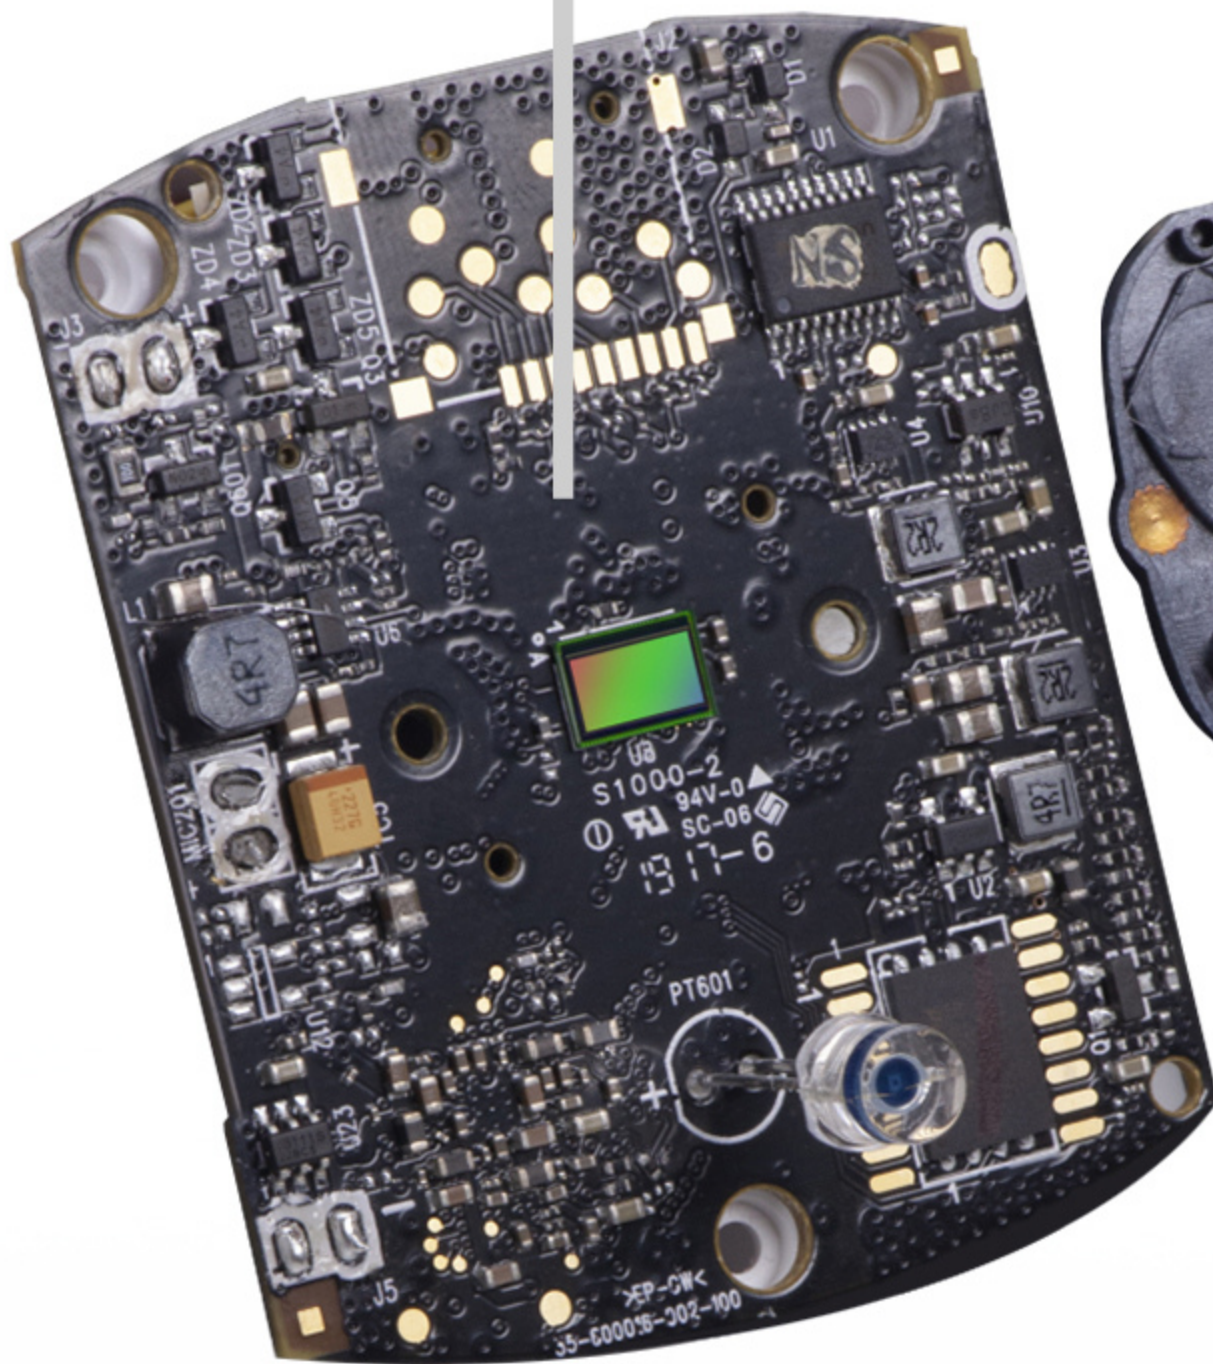

270p video quality and narrow viewing on standard viewer

Grainy and off-colored image. 60° viewing angle may be difficult to cover the entire crib.

Children are apple of our eyes! Enjoy sharp, crisp images in 720p that has 7x more pixels than the standard monitor's viewer. Once you experience the True-Color HD videos on a wide-angle screen, you won't look back.
