NEW!
Digital IonAir
technology

T3 is driven by enthusiasm to empower you to look and feel your best. Our products are built on a foundation of innovation and technology that is backed by science and propelled by passion. The goal is to simplify beauty and create smart styling tools that actively help care for your hair!

Introduce your tool kit to the innovative technology of Digital IonAir. The **T3 Cura Luxe** delivers digitally controlled heat with a wide stream of air that quickly and effectively dries your hair while maintaining body and shine.

A built-in **Ion Generator** releases negative ions to cool the hair shaft, control frizz and give you soft, smooth-looking results.

The exclusive **Volume Booster** switch allows you to give your look more volume and texture by switching off the ionizer, and the **Auto Pause** sensor automatically pauses airflow when you release the handle to make your style session easy and carefree.
