SOLAR STARBURST STAKE LIGHTS PACK OF 4

ASSEMBLY & OPERATION

1. Carefully unpack your solar lights from the box (see 'STEP 1').
2. Push the top and bottom stake pieces firmly together (see 'STEP 2').
3. Insert the stakes into the ground, ensuring they are stable and will not fall over.
4. Switch the power buttons on the solar panels to the 'ON' position.
5. Arrange the flexible light branches as desired (see 'STEP 3').
6. First time use: The solar light will require at least 8 hours of full and direct sunlight to fully charge the battery. Make sure the unit is turned on while charging.
7. As long as the battery has a sufficient charge, the product will automatically illuminate when it gets dark and turn off during the day.

BATTERY REPLACEMENT

The battery should typically be replaced annually, or when the charging ability decreases.

To replace the battery, remove the locking screw and open the box (see 'STEP 1').

After taking out the old battery, insert a new 1 x AA 1.2V Ni-MH 600mAh rechargeable battery (see 'STEP 2').

The discarded battery should be disposed of safely. Please recycle where facilities exist.

Check with your local authority or retailer for recycling advice.
