

Le Creuset Textiles Care Instructions

Le Creuset kitchen textiles are heat, steam and stain resistant. They are made of a unique combination of natural materials:

1st Layer: commercial quality towelling – 100% cotton. An excellent natural insulator. Stain and splash resistant thanks to a special stain resistant coating.

2nd Layer: stitch bonded cotton interlining – extra protection from this traditional lining. A proven insulator.

3rd Layer: integral steam/grease barrier – an additional layer to prevent dangerous transference of heat if gloves get wet or greasy during use.

4th Layer: canvas - 100% cotton. Stronger and more resistant than drill or jacquard. With a stain resistant coating – the most durable coating available to resist stain and repel water.

Cleaning and care

Le Creuset kitchen textiles are easy to clean as they are fully machine washable and pre-shrunk.
